 Last Updated on STN: 31 Mar 1993

AB A sensitive laser-induced fluorescence (LIF) detection scheme for native **nucleic** acids and **DNA** restriction fragments separated by capillary electrophoresis (CE) has been developed. The 275.4-nm line from an **argon** ion laser or the 248-nm line from a waveguide KrF laser is used to excite native fluorescence. Detection limits for guanosine and adenosine monophosphate (1.5 times 10⁻⁸ and 5 times 10⁻⁸ M, respectively) are up to 3 orders of magnitude lower than UV detection. Sensitivity for native fluorescence of **DNA** restriction fragments in gel-filled capillaries rivals that of UV absorption. The decrease in performance in gel-filled separations using LIF detection is caused by the high background associated with gel fluorescence, as well as gel quenching of the fluorescence emission. The development of gels exhibiting lower background fluorescence or off-column coupling should lead to significant improvements in sensitivity over UV detection. This novel and practical system enables for the first time, the sensitive detection of **nucleic**-acid-containing compounds without the need for fluorescence labeling.

ISSUE CLASS FIELDS (/INCL) CURRENT THROUGH: 18 Dec 2003 (20031218/PD)

REVISED CLASS FIELDS (/NCL) LAST RELOADED: Jun 2003

USPTO MANUAL OF CLASSIFICATIONS THESAURUS ISSUE DATE: Jun 2003

USPAT2 is a companion file to USPATFULL. USPAT2 contains full text of the latest US publications, starting in 2001, for the inventions covered in USPATFULL. USPATFULL contains full text of the original published US patents from 1971 to date and the original applications from 2001. In addition, a USPATFULL record for an invention contains a complete list of publications that may be searched in standard search fields, e.g., /PN, /PK, etc.

USPATFULL and USPAT2 can be accessed and searched together through the new cluster USPATALL. Type FILE USPATALL to enter this cluster.

Use USPATALL when searching terms such as patent assignees, classifications, or claims, that may potentially change from the earliest to the latest publication.
